# INDEX

**Ahlers, G., Brown, E. & Nikolaenko, A.** The search for slow transients, and the effect of imperfect vertical alignment, in turbulent Rayleigh–Bénard convection, 347–367

**Akylas, T. R.** *See* Kim & Akylas

**Ashmore, J.** *See* Yang, Seddon, Mullin, del Pino & Ashmore

**Besio, G., Blondeaux, P. & Vittori, G.** On the formation of sand waves and sand banks, 1–27

**Blondeaux, P.** *See* Besio, Blondeaux & Vittori

**Brady, J. F.** *See* Khair & Brady

**Brown, E.** *See* Ahlers, Brown & Nikolaenko

**Dalziel, S. B.** *See* Davidson, Staplehurst & Dalziel

**Darve, E.** *See* Saintillan, Shaqfeh & Darve

**Davidson, P. A., Staplehurst, P. J. & Dalziel, S. B.** On the evolution of eddies in a rapidly rotating system, 135–144

**Etoh, T. G.** *See* Thoroddsen, Etoh & Takehara

**Fuhrman, D. R.** *See* Madsen & Fuhrman

**Hill, D. J., Pantano, C. & Pullin, D. I.** Large-eddy simulation and multiscale modelling of a Richtmyer–Meshkov instability with reshock, 29–61

**Joseph, D. D.** *See* Padrino & Joseph; Wang & Joseph

**Khair, A. S. & Brady, J. F.** Single particle motion in colloidal dispersions: a simple model for active and nonlinear microrheology, 73–117

**Kim, B. & Akylas, T. R.** On gravity–capillary lumps. Part 2. Two-dimensional Benjamin equation, 237–256

**Kim, K. & Sung, H. J.** Effects of unsteady blowing through a spanwise slot on a turbulent boundary layer, 423-450

**Koch, D. L.** *See* Subramanian & Koch

**de Laat, T. W. G.** Impulse and conformal mapping of vortex flows, 399–409

**Lishman, B. & Woods, A. W.** The control of naturally ventilated buildings subject to wind and buoyancy, 451–471

**Madsen, P. A. & Fuhrman, D. R.** Third-order theory for bichromatic bi-directional water waves, 369–397

**Marino, L.** *See* de Socio & Marino

**Mullin, T.** *See* Yang, Seddon, Mullin, del Pino & Ashmore

**Niemela, J. J. & Sreenivasan, K. R.** Turbulent convection at high Rayleigh numbers and aspect ratio 4, 411–422

**Nikolaenko, A.** *See* Ahlers, Brown & Nikolaenko

**Padrino, J. C. & Joseph, D. D.** Numerical study of the steady-state uniform flow past a rotating cylinder, 191–223

**Pantano, C.** *See* Hill, Pantano & Pullin

**Pascazio, G.** *See* Stringano, Pascazio & Verzicco

**del Pino, C.** *See* Yang, Seddon, Mullin, del Pino & Ashmore

**Pullin, D. I.** *See* Hill, Pantano & Pullin

**Saintillan, D., Shaqfeh, E. S. G. & Darve, E.** Effect of flexibility on the shear-induced migration of short-chain polymers in parabolic channel flow, 297–306
